Virtuelco platform testing report Report on Educational Activity: Simulation of the salary calculation

Erasmus+ project “Virtuelco for All”,

Date / Time / Duration
26 March 2026, 11am, 1 hour
Testing with:
Students of the third year of the educational profile Financial accounting technician
OliveraStošić, Teacher and Coordinator of the Project,
Place: Economic school “V. Karadžić”, Velika Plana, Serbia
Purpose: Platform functionality check

Summary:

Report on Educational Activity:

Students performed a payroll simulation for employees within a virtual company. The initial phase involved entering the relevant periods and calculation parameters. Subsequently, they processed individual employee data, including varying salary coefficients and years of service, utilizing the platform to calculate the respective gross and net earnings.

The students demonstrated a high level of proficiency because they already have experience in this part of economy . Feedback indicates a high degree of student satisfaction with the acquired practical skills and the **digital innovation** integrated into the curriculum, which bridges the gap between theoretical knowledge and professional practice.

The students expressed great satisfaction with the opportunity to prepare for the real world of work, where payroll is processed using the same methodology.

Testing reported by coordinatorof the Aurora team:

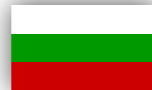

OliveraStošić
