Virtuelco platform testing report

Erasmus+ project “Virtuelco for All”,

Date / Time / Duration

22.04.2026, 14 p.m, 2 hours

Testing with:

Teachers and principals

Silvia Toneva PhD – trainer and consultant of the project

Place: Novi Iskar district, municipality conference hall

Purpose: Platform functionality check and motivation to use it

Summary:

8 directors and teachers from the region learned about the project, the platform and its practical applicability. They received a username and password for access, so that they could use it in their activities if interested. The main menus were demonstrated, the possibility of using the platform step by step for different purposes - creating companies, preparing inquiries, processing offers, invoices and all accompanying activities in the virtual enterprise. One of the schools has a specialty in e-commerce, but there is no time in the curriculum for additional activities. The possibility of showing it in class and giving it for practice during the summer vacation was discussed.

The participants liked the tool and congratulated the team for the extremely valuable work on creating such a useful tool. They found the work easy and very well structured, and according to them, every teacher can choose how to use Virtuelco, if they have the opportunity.

We received an offer to show it to local community centers, which offer free entrepreneurship courses for young people during the summer.
